I like the singleton design pattern in ABAP

– Be aware that some people don’t

– I don’t care – it works for me

I like getters (& sometimes setters) i.e. Accessors & Mutators

– Be aware that some people don’t

– I don’t care – it works for me

Code patterns for reusability

I
CARE

You can implement business logic however you like…
just remember the first & second rules of reusability

Code patterns for reusability

I like the singleton design pattern in ABAP

- Be aware that some people don't
- I don't care – it works for me

I like getters (& sometimes setters) i.e. Accessors & Mutators

- Be aware that some people don't
- I don't care – it works for me

You can implement business logic however you like…
