

# KNOWN CONSTRAINTS

**SAP** 1574568 - SAP NetWeaver Gateway 2.0 - Known Constraints

Version: 15.1 | Validity: 20.07.2016 | active | Language: English (Standard) | Compare versions | PDF | Download

Content: Summary | Header Data | Details | References

### Symptom

THIS SAP NOTE OUTLINES THE CONSTRAINTS APPLICABLE TO SAP NetWeaver Gateway 2.0.

### Other Terms

CRU-DE

### Reason and Prerequisites

These constraints apply in addition to the requirements and constraints described in the SAP NetWeaver Gateway 2.0 documentation on <http://help.sap.com/magateway>.  
For more information about SAP NetWeaver Gateway 2.0, see SAP Note 1580185.

### Solution

Read carefully and act accordingly.

THIS SAP NOTE CONTAINS SEVERAL SECTIONS:

- **General Constraints:** These apply to SAP NetWeaver Gateway as a whole.
- **Constraints for the software component versions** `gw_mo 140` and `gw_cont 190` that are available with SAP NetWeaver Gateway 2.0 SP4 are described in SAP Note 1751547.
- **General Constraints for Generic Channel:** These apply to the Generic Channel specifically.
  1. **dot/HTTP generator constraints:** These constraints apply to the dot/HTTP generator IF it leverages the generic runtime.
  2. **screen scraping constraints:** These constraints apply to the screen scraping generator IF it leverages the generic runtime.
  3. **content:** These constraints apply to some of the content that leverages the generic runtime.

**General Constraints**

The following constraints apply to SAP NetWeaver Gateway as a whole.

1. **com.sap for sap (standard mode):** the implementation of the com.sap protocol "com.sap for sap", provided with SAP NetWeaver Gateway 2.0 SP1, has the following constraints:

SAP Note 1574568

# ZIF\_GW\_METHODS~GET\_ENTITYSET

- Create anonymous data object
- \$orderby
- \$filter
- \$inlinecount
- \$top & \$skip
- \$count
- \$skiptoken
- Fill entities
