</EntityType>

```

# DATES & TIMES

Name	Is Key	Edm Core Type
SalesOrderId	<input checked="" type="checkbox"/>	Edm.String
SalesOrderDate	<input type="checkbox"/>	Edm.DateTimeOffset

```
<EntityType Name="SalesOrder" sap:content-version="1">
  <Key>
    <PropertyRef Name="SalesOrderId"/>
  </Key>
  <Property Name="SalesOrderId" Type="Edm.String" Nullable="false" MaxLength="18" sap:label="Sales Document" sap:creatable="false" sap:updatable="false"/>
  <Property Name="SalesOrderDate" Type="Edm.DateTimeOffset" Precision="7" sap:label="Document Date" sap:creatable="false" sap:updatable="false" sap:filterable="false"/>
  <NavigationProperty Name="Customer" Relationship="ZDEMO_SRV.Customer_SalesOrder" FromRole="ToRole_Customer_SalesOrder" ToRole="FromRole_Customer_SalesOrder"/>
  <NavigationProperty Name="SalesOrderItems" Relationship="ZDEMO_SRV.SalesOrder_Items" FromRole="FromRole_SalesOrder_Items" ToRole="ToRole_SalesOrder_Items"/>
</EntityType>
```

Use **Edm.DateTimeOffset** for date/time/timestamp properties

Don't be tempted to use **Edm.String** "for convenience"  
Edm.DateTime replaced in oData V4 specification
