OData Query Options

The OData query options supported by SAP NetWeaver Gateway belong to either of these categories:

- They are automatically available in the framework, no further actions needed by development.
- They are available, but they require implementation efforts from development.

OData Query Options	Additional Implementation Needed
\$select	No
\$format	No
\$expand	No
\$filter	No
\$top	No
\$skip	No
\$orderby	Yes
\$group	Yes
\$skip	Yes
\$filter	Yes
\$countonmeasures	Yes
\$skiptoken	Yes
