- Design for Consumers

- Think oData i.e. Entities, Associations, etc.

- Leave SAP domain knowledge at the door

- REST API's should be self-describing

- Function Imports should be for special cases

SERVICE DESIGN PRINCIPLES

SERVICE DESIGN PRINCIPLES

- Design for Consumers

- Think oData i.e. Entities, Associations, etc.

- Leave SAP domain knowledge at the door

- REST API's should be self-describing

- Function Imports should be for special cases

GENERAL THEORY OF API DESIGN

Everything should be made as simple as possible but not simpler.
